

Environmental Policy

OPSIS LiquidLINE continuously strives to

- apply and improve resource and energy efficient as well as environmentally friendly manufacturing processes in order to continuously reduce our impact on nature.
- fulfil customer requirements for environmentally friendly and easy to handle technical systems.
- contribute to improving the operations of our customers with regard to the environment.
- use environmentally friendly material and manufacturing methods and assess these from a health perspective.
- promote sorting at source of waste and packaging and prevent emissions and pollution.
- collaborate with green distributors and subcontractors.
- comply with legal requirements, provisions and environmental rules which the company must live up to.

The management of OPSIS LiquidLINE commits to work with continuous improvements of the management system with respect to the environment, in order to prevent pollution and enhance environmental performance.
